Please remember that this organization is run by volunteers.
Thank you for submitting a PR. We will get to it.

· 42m

We are experiencing a similar issue:

Could you give an update about the progress of fixing this bug?

· 12m

Could you give an update about the progress of fixing this bug?

This is open-source software. Unless someone volunteers to fix it, there won't be any progress. It's in your own power to fix this bug.

My installation log isn't for advertising space. If you want donations, please do the right thing and promote yourself in places where appropriate. My logs are long enough as it is without this.

The right thing to do is to remove it.

EDIT: An unmaintained fork is available:

Luckily kindness exists

unknown yesterday

Sorry for the mere "I agree" comment, but at least I'd like to stress out the security perspective here. Adding a rather unknown and unmaintained library, that adds a transitive dependency that is also unknown and unmaintained, could be interpreted as one step in a supply chain attack. So I'd also be grateful if you could reconsider. Thanks very much!

(please note that this isn't about any concrete mistrust on you or the library authors, more about the general security, so I developed a solid level of paranoia")

👍 5

Sending hugs to Log4J people. This must be an extraordinarily shitty Friday for them.

commented 41 minutes ago · edited

You've done some great work in the past days/weeks, thanks! Tried to merge, resolved conflicts, but ran into some issues. Could you check them? Did the merge based on your work in the previous PR's I just merged.

README.md > # Well known files

```
1   # Well known files
2
3   Welcome to the Well-known files project. This repository contains all well-known files you could find
4   in a GitHub repository.
5
6   # Introduction
7   Besides code being tracked in a repository you typically find files which are
8   for documentation purposes. They explain something such as how to get started
9   , how to contribute or how to report security concerns.
10
11  These files usually are named in uppercase with and optional extension written
12  in lowercase, e.g. `README.md` or `LICENSE`.
13
14  # Table of contents
15  - [Acknowledgements](#acknowledgements)
16  - [Authors](#authors)
17  - [Changelog](#changelog)
18  - [Citation](#citation)
19  - [Cname](#cname)
20  - [Code of conduct](#code-of-conduct)
21  - [Code owners](#code-owners)
22  - [Contributing](#contributing)
23  - [Contributors](#contributors)
24  - [Dependabot](#dependabot)
25  - [Funding](#funding)
26  - [Governance](#governance)
27  - [Issue templates](#issue-templates)
28  - [License](#license)
29  - [Pull request template](#pull-request-template)

DannyvdSluijs / README.md

Hi there 👋

My name is Danny van der Sluijs, and I am a Technical Lead at Infi and Maintainer of JsonMapper who likes contributing to open source ✨.

To help out with the open source community there are some project I contribute to and/or manage:

- JsonMapper
- JSON Schema for PHP
- Exact PHP Client
- Laravel Mail CSS Inliner

If one of those open source projects is critical for your business, please consider supporting my work with your sponsoring 💕

🔭 Check out what I'm currently working on

- jsonrainbow/json-schema (3 days ago)
- DannyvdSluijs/ExactOnlineRestApiReference (4 days ago)
- DannyvdSluijs/DannyvdSluijs.github.io (1 week ago)
- picqer/exact-php-client (1 week ago)
- sourcemeta/learnjsonschema.com (1 week ago)
- myclabs/php-enum (2 weeks ago)
- fedeisas/laravel-mail-css-inliner (2 weeks ago)

4 Sponsoring

Sponsoring options

- **GitHub sponsors:** This requires a first time set up your account for sponsoring and add a *.github/FUNDING.yml* to your project(s) or GitHub profile. People can sponsor money

- **Buymeacoffee**: Comparable to GitHub sponsers

- **JetBrains:** Sponsors projects with a license for all their products, requires your project meets the criteria of OSS

- **GitHub**: Copilot pro for free if you qualify

- **Employer**: They can sponsor time to work on your project

Recap
